

DD/S&T 3183- 66

16 June 1966

MEMORANDUM FOR: Chief, Administrative Staff, DD/S&T

SUBJECT : OSP Comments on Agency Study of Space Requirements

25X9

25X9

1. The "total departmental personnel" figure of [redacted] quoted in the 2 June paper from O/L continues to reflect our best estimate for the 1975-1980 period. We are currently projecting about [redacted] square feet for a departmental T/O of [redacted], so the figure [redacted] square feet for [redacted] people would appear to be lean by about [redacted] or 7,000 square feet.

25X9

2. Due to the necessity for reasonably frequent contact with the CIA "front office" regarding our activities, and since our operational programs at times require immediate use of computer and communications facilities, it is our belief that OSP must continue to be located in Langley. If the entire Directorate were located in a separate building in the Langley area, with special communications and computer facilities, however, we could see no objection to including OSP in such an arrangement.

3. We do not now envisage the need for construction of special facilities in any planned new building.
